

Chemical Engineering

Spring 2020 Seminar Series

School for Engineering of Matter, Transport and Energy

DATE	SPEAKER	TITLE
January 13 10:45 am BDBB 105	Alexis Bell DISTINGUISHED SPEAKER The Dow Professor of Sustainable Chemistry UC Berkeley	<i>"Identifying what controls the activity and selectivity of heterogeneous catalysts using experiments and theory"</i>
February 24 10:45 am BDBB 105	Joseph McCarthy Chemical/Petroleum Engineering University of Pittsburgh	<i>"Atmospheric water scavenging; Exploiting a particle-based hierarchically-ordered porous materials"</i>
March 2 10:45 am BDBB 105	Huimin Zhao Chemical and Biological Engineering University of Illinois at Urbana	<i>"Synthetic Biology: Putting Synthesis into Biology"</i>
March 16 10:45am BDBB 105	Bradley Olsen Assoc. Professor of Chemical Engineering MIT	<i>"To be Announced"</i>
April 6 10:45am BDBB 105	Dimitrios Papavassiliou Professor of Chemical Engineering University of Oklahoma	<i>"Insight to Interfacial Transport using Computations at Different Scales "</i>
April 20 10:45am BDBB 105	Teresa Gordon Chancellor's Professor UC Berkeley	<i>"To be announced"</i>
April 27 10:45 am BDBB 105	Joachim Kohn Chemical & Chemistry Engineering Rutgers university	<i>"Challenges and Opportunities of Biomaterials for Tissue Engineering"</i>
