# Chemical Engineering
Spring 2019 Seminar Series

## School for Engineering of Matter, Transport and Energy

<table>
<thead>
<tr>
<th>DATE</th>
<th>SPEAKER</th>
<th>TITLE</th>
</tr>
</thead>
</table>
| January 28 10:45 am CPCOM 103 | Jennifer Curtis  
College of Engineering  
University of California, Davis | “Toward Simulation-Based Design of Particle Handling Processes” |
| February 4 10:45 am CPCOM103 | Daniel Schwartz  
Department of Chemical Engineering  
University of Washington | "Whole-Cell Science of Lithium Ion Batteries” |
| February 11 10:45 am BDBB 105 | Distinguished Scholar Lecture  
Juan de Pablo  
Institute of Molecular Engineering  
University of Chicago | "Liquid Crystals - From Simple Self-Assembled Constructs, to Autonomous Materials” |
| March 18 10:45am BDBB 105 | Shri Ramaswamy  
Department of Bioproducts & Biosystems Engr.  
University of Minnesota | To be announced |
| April 1 10:45am BDBB 105 | Ramon Gonzalez  
Department of Chemical & Biomedical Engr.  
University of Florida | To be announced |
| April 8 10:45 am BDBB 105 | John Gladden  
Joint BioEnergy Institute  
Sandia National Laboratories | To be announced |
| April 15 10:45 am BDBB 105 | Joel Karr  
Department of Chemical and Biological Engr.  
University of Colorado, Boulder | “Connecting Protein Structure, Function, and Interfacial Dynamics with Single-Molecule Methods” |
| April 22 10:45 AM BDBB 105 | Randall Snurr  
Department of Chemical and Biological Engr.  
Northwestern University | “Metal-Organic Frameworks as Tunable Platforms for Gas Storage, Chemical Separations and Catalysis” |
